DESIGN

2020/21

COMMITMENT

Dear Customers and Partners,

We are experiencing an unprecedented global pandemic which has significantly impacted restaurant and catering businesses.

We are asking ourselves and our teams to think how we can use this situation to reimagine our potential together, how we can rethink our business models to adapt to new needs and new expectations arising from the crisis.

New areas for research and development involve the diversification of offers and services as well as the creation and launch of new activities. Deliveries (to homes and offices), takeaway sales and self-service catering already exist on the market; however, they will expand for new reasons:

- **Home deliveries** will be in demand as during the quarantine many consumers have tried and appreciated this service guaranteeing the availability of high-quality fresh and local products prepared by professionals who comply with **sanitary standards!**
- **Click & Collect of gourmet meals** will expand as well-known chefs have also realized that to attract and retain customers their top-quality cuisine should be more **accessible and deliverable** to provide consumers with a possibility to enjoy it while staying at home.
- **Takeaway sales** will multiply because they represent for the customer a friendly, economical and fresh mode of catering while respecting the **distancing** that will remain for some time in our habits. For professionals, this is a way to offer more **profitable and sustainable** offers.
- **Self-service catering with a selection of hot and cold** home-cooked dishes will be appropriate for canteens at the production sites, kitchens and even in some restaurants and hotels to offer customers various and varied options (breakfast, lunch and full dinner) with the opportunity to refresh oneself at any time of the day and without the need to wait!

To meet these needs, we have developed and introduced new offers involving a wide selection of solutions. For example, the new **Meal Box** and **Bowls** are perfectly suitable to deliver gourmet food respecting the goal to comply with our **environmental and social commitments**. The latest version of the catalogue is **focused on materials** with some useful and practical information that will help you in choosing the best solution.

This year, we have also created **PLANETSCORE®**. This is a first ever tool which scores the sustainability of our products, providing more transparency on raw materials we choose.

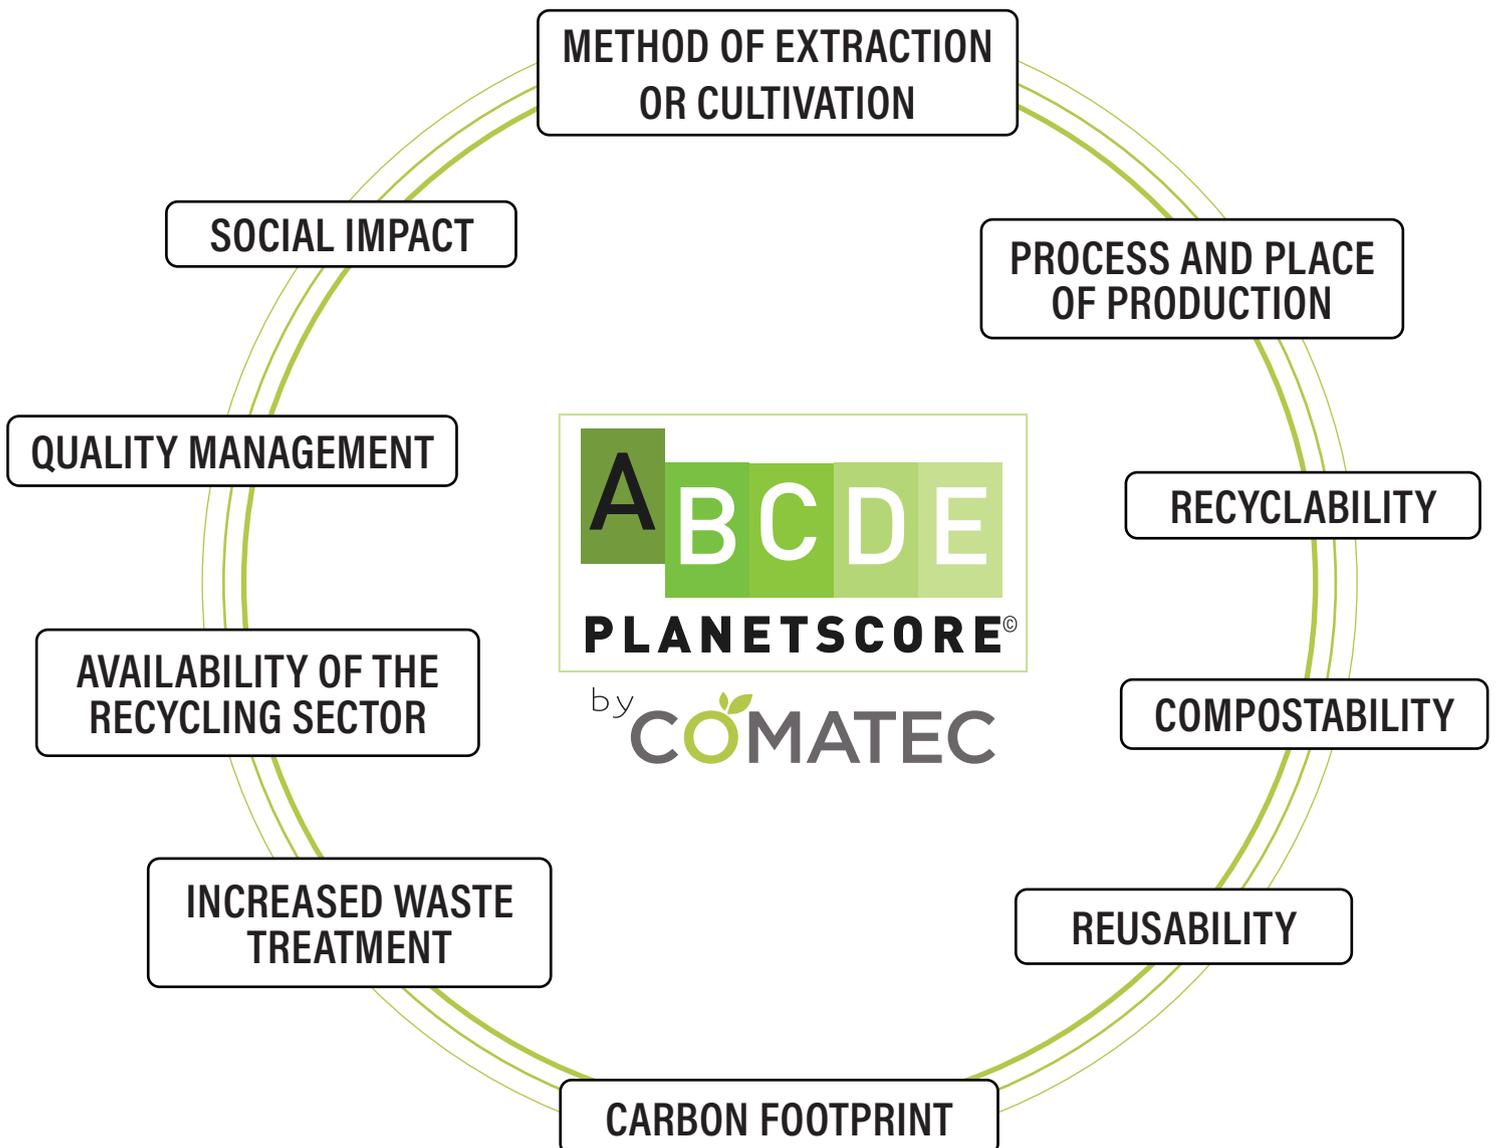

Be safe, be inspired and creative!

Tatiana Rumeau

# PlanetScore<sup>®</sup>, our 10 criterias

## What is PLANETSCORE<sup>®</sup> ?

- It is a first ever tool in the packaging to score the sustainability of our products and raw materials that we choose. It's presented as a logo informing about the environmental impact of products developed, selected or distributed by COMATEC.
- It is a 5-letter scale rating (A, B, C, D, and E) based on ten clear criteria regarding a sustainable approach to the environment.
- It is a standard for foodservice professionals which are concerned by an eco-responsible packaging and their choices are driven by concrete sustainable engagements.
- It is a tool used by our R&D department to continue our quest for promising new materials and new production processes, in addition to our collaboration with government bodies and local authorities for the further development of recycling sector.

# First rating of our packaging materials

## What are the 10 rating criterias?

1. Method of extraction or cultivation
2. Process and place of production
3. Recyclability
4. Compostability (industrial or home composting)
5. Reusability
6. Carbon footprint
7. Increased waste treatment
8. Availability of the recycling sector (in France and in Europe)
9. Quality management
10. Social impact

## What is the principle of rating?

Thanks to the five-letter logo (A, B, C, D and E) each product in the COMATEC catalogue is presented on a five-level scale in accordance with the specified criteria:

- The most environmentally friendly product in terms of its environmental impact (classified by letter A+), for example, WoodBox series (due to its origin from French eco-forests and its combustion, which contributes to high energy regeneration)
- The least environmentally friendly product, for example, due to its material, method of cultivation or absence of a recycling sector (classified by letter E), for example, PLA (cultivation method and lack of recycling sector, carbon print) or PS produced in Asia (carbon print and recycling sector is not yet sufficiently developed in Europe).

PLANETSCORE® is the first ever tool in the world of packaging to scale the sustainability of our products and our commitment to ensure greater transparency of the materials we choose and our further actions for improvements.

**By choosing COMATEC, you are supporting our commitments!**

\* Technical data are not binding and given as an example

Proposed by AIB-Vincotte since 1994, this OK Compost conformity trademark is affixed to 100% biodegradable materials and indicates that the labeled products disintegrate completely and improve the final composition of the compost.

EN 13432 is a defined standard which encompasses the characteristics of reusable packagings by composting and biodegradation

**NEW** NOVELTIES

MICROWAVE

TRADITIONAL OVEN

STERILIZATION : 70°C to 85°C

FREEZING

QUICK FREEZING

DISHWASHER, tested on more than 20 cycles

REUSABLE MATERIAL : this is material that will be partially or fully introduced into the reproduction cycle by reducing the use of pure raw materials.

RECYCLABLE: refers to material that will partially or fully enter a reproduction cycle, reducing the use of pure raw material

BIODEGRADABLE : means a product that can easily decompose under the influence of living organisms (without the addition of chemicals) and without harmful effects on the environment. The duration of biodegradability will depend on the amount of oxygen, humidity and temperature. We remind you that the name "biodegradable", "compostable" or more broadly "degradable" can in no way be an excuse for leaving products in the nature. Products do not decompose quickly, they pose a risk of environmental pollution, including the risk of ingestion by wild animals.

RENEWABLE : means a product from natural resources, the stock of which can be replenished in a short time on a human scale. The stock should be able to renew at least as fast as it is consumed.

COMPOSTABLE : this is, first of all, a biodegradable product that can be turned into compost at an industrial enterprise. Industrial composting must comply with specific standards (temperature 75-80 °, humidity 65-70% and oxygen content 18-20%). Under these conditions, the composting process takes about 12 weeks. EN13432 standard

MADE OF BIO SOURCE or BIOPLASTIC is a non-food industrial product obtained from biomass (for example, plant origin or micro-organism). These are renewable products such as corn starch, potato starch, textile fibers or cellulose, bamboo.

ECO-DESIGN means integrating the environment from product design and at all stages of its life cycle (standard ISO/TR14062). This approach seeks to find the best balance between environmental, social, technical and economic requirements

CUSTOMIZABLE according to the customer's specifications.

# MEAL TRAYS & LUNCH BOXES

---

We offer a very wide range of individual and made-for-sharing meal trays and boxes. We offer original, practical solutions for delivery and takeaway, in several materials, no frills, just the essentials. Such as the new minimalist concept Essential, no cover or overpack, in FSC-certified cardboard.

We have redesigned some of our bestsellers, such as Biodine, Maderadine, Quadra and even our Cubik wood plates!

To stand out from the crowd with a design that is all your own, ask about our customisation service!

To support your takeaway or delivery meals, don't forget our accessories (page 168), indispensable at the current time!

Humidified curl cotton towel. Menthol scent. Can be heated in the microwave or freshened up in the refrigerator.

With a simple pressure, the capsule releases a viscose napkin imbued with a subtle perfume.

# WOOD

---

The wood of poplar (*Populus Salicaceae*) or pine (*Pinaceae*) comes from different forests of the world. Poplar plantations are an excellent carbon sink, let's give them priority.

For the Madera and Wood Box series, Comatec selects poplars exclusively from French forests that are sustainably managed and certified by PEFC. Suitable for food contact.

After use, it is often used in the form of energy (after sorting and crushing) or as chips for mulching soil and other products.

This material is a part of our environmental approach.

*The wood of poplar (Populus Salicaceae)*

# PULP

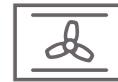

---

The pulp is a natural material obtained from sugarcane fiber: plant cellulose is used by grinding, and the juice is restored to produce sugar. One ton of sugarcane produces about 300 kg of pulp. Our pulp is made in China.

The pulp is a 100% renewable resource since its consumption does not exceed its biological recovery. Sugarcane grows in 10-16 months, depending on growing conditions. The need for water is important, but the crop is of interest, and the life expectancy is 10 years.

The pulp is an ally for users who care about the environment. Its use is very wide. We offer it in the form of bowls, lunch boxes, plates, cups or trays.

If you must find fault with sugarcane fibre, it could only be the procurement lead times and the fact that it is processed so far away: in China.

*Pulp or sugarcane fiber*

# BAMBOO, WHEAT & COCONUT

Bamboo is a woody grass of the Phyllostachys Heterocyclus variety. It grows mainly in forests, 65% of which are in Asia (our deliveries come from China). Bamboo grows very quickly and consumes a little amount of water.

Bamboo emits 30% more CO2 than hardwood and therefore emits 30% more oxygen. This material is very durable, lightweight, reusable, it is used, in particular, for the manufacture of trays, sticks or bowls.

Our natural straws come from real organic wheat straw produced in Europe. Collected, washed, dried and cut by enterprises of social and professional integration, it may have some natural defects (size, curvature, stain, etc.).

Our coconut bowls are natural mottled products of various sizes and volumes. They can be reused.

# PALM LEAF

---

When we talk about a palm tree, we actually mean the leaf sheath of a betel palm tree. Leaves bound to the bark of the tree, they are cleaned, dried and thermoformed. No processing and no additions are added to produce plates or other products.

The material is 100% natural, waterproof and heat resistant. Compostable and 100% biodegradable, the palm tree is an ideal resource to tackle our environmental problems.

If we had to find a flaw in the palm, it would be a delivery distance, because it comes from India, but we choose local cooperatives on fair terms.

*Betel palm tree*

# CARDBOARD & PAPER

Cardboard is a vegetable fiber tree, converted to cellulose, and finally to paper that will be overlaid, to get cardboard. Most of the trees are from eco managed forests.

The raw materials are from France and Spain. The recycling sector is very well organized and efficient.

A ton of recycled paper represents about 2.5 tons of saved wood.  
In the process of our eco conception, we are used to give an advantage to the cardboard, because in Europe this material is at 85% recycled.

Sometimes, it is laminated (PE cover) to hold hot liquids.

# GLASS

---

Glass is mainly a mix of sand, soda and limestone.  
It comes in two qualities: borosilicate glass and soda lime glass.

Borosilicate glass, made from 80% silica, is characterised by its high resistance to mechanical and thermal shock (more than 300 °C).

Soda lime glass, made from 70% silica, is used mainly in industrial manufacturing for food products (bottles, jars, glasses). It is more delicate and sensitive to thermal variations.

We source our supplies in France, Spain and China.

Glass has one major advantage: it is 100% recyclable, over and over again.

And two small disadvantages: its weight and the energy needed to melt it (1,400 °C), but it is so often reused in its original form that it can be classified as a green material.

In France, up to 74% of glass products are recycled.

*Sand, soda and limestone make up glass*

# CERAMICS

---

Ceramics are a broad category comprising terracotta, porcelain and even stoneware. They are made from clay, sand or lime. They are then glazed to make them impermeable and watertight.

Despite their weight, fragility and the energy needed to produce them (between 800 and 2,000 °C), ceramics are durable materials, which can be reused over and over again and are resistant to all types of heat.

# STAINLESS STEEL

---

18/8 stainless steel is low carbon steel containing 18% chromium and 8% nickel.

Stainless steel is considered as “green material” because it is infinitely recyclable and environmentally friendly.

Easy to clean, unbreakable, aesthetic, durable and reusable, it becomes a relevant material because we control its production (from Asia) and the possibility of its recycling in France (at least 80%).

Our cutlery, pots and containers are melted to be recycled into new cutlery or crockery.

*Chromium oxide*

# PET & RPET

---

PET (polyethylene terephthalate) is a fossil material transformed to manufacture packaging by injection or hot stamping. The main advantage of PET or rPET is its endless recycling!

To be recycled, the PET plastic packaging is flattened to form huge cubes called plastic balls. Sealed in this way, they are ready for shipment to a plastic recycling plant. Plastic balls are first cleaned, chopped and softened. After a very precise process of technical transformation, plastic packaging becomes crystals of different colors. These crystals are then washed and heated to a very high temperature to turn into plastic granules. Then the granules are sent to the recycling plants to get a new life.

Thanks to our supply and production in France, we can guarantee 100% traceability. To reduce the use of pure material, we are increasingly using recycled PET (rPET). We prefer this material because it guarantees food safety and financial reliability. We believe that PET is the main product of the circular economy and we strongly recommend its usage.

*PET (polyethylene terephthalate)*

# PLA & CPLA

---

PLA (polylactic acid) and CPLA (crystallized polylactic acid), called bioplastics, are produced by fermentation of sugar (China, Asia) or starch (USA, China) under the influence of bacteria that synthesize lactic acid.

Then it is polymerized, becomes solid and capable of injection or hot stamping. About 1 kg of corn is needed to get 0.385 kg of PLA.

The difference between PLA and CPLA is limestone, which is introduced into the bioplastics to make it more heat-resistant (85°C instead of 40°C).

This material comes from renewable, biodegradable and compostable sources, but today there are no plants and channels to recycle it.

# PP & PP-TALC

---

PP (polypropylene) comes from fossilized material turned into granules.

At Comatec, eco-design also includes reducing the use of fossil raw materials. Adding food talcum powder and thanks to our French know-how, we reduce the use of plastic by 20%, obtaining high-quality products that are solid, reusable and washable.

For recycling, plastic polypropylene (PP) packaging is sorted, crushed, and then roughly cleaned. Following to a very precise technical conversion process, these crystals are then washed and heated to a very high temperature to be converted into plastic granules. Then the granules are sent for a new production, a new life.

# PS

---

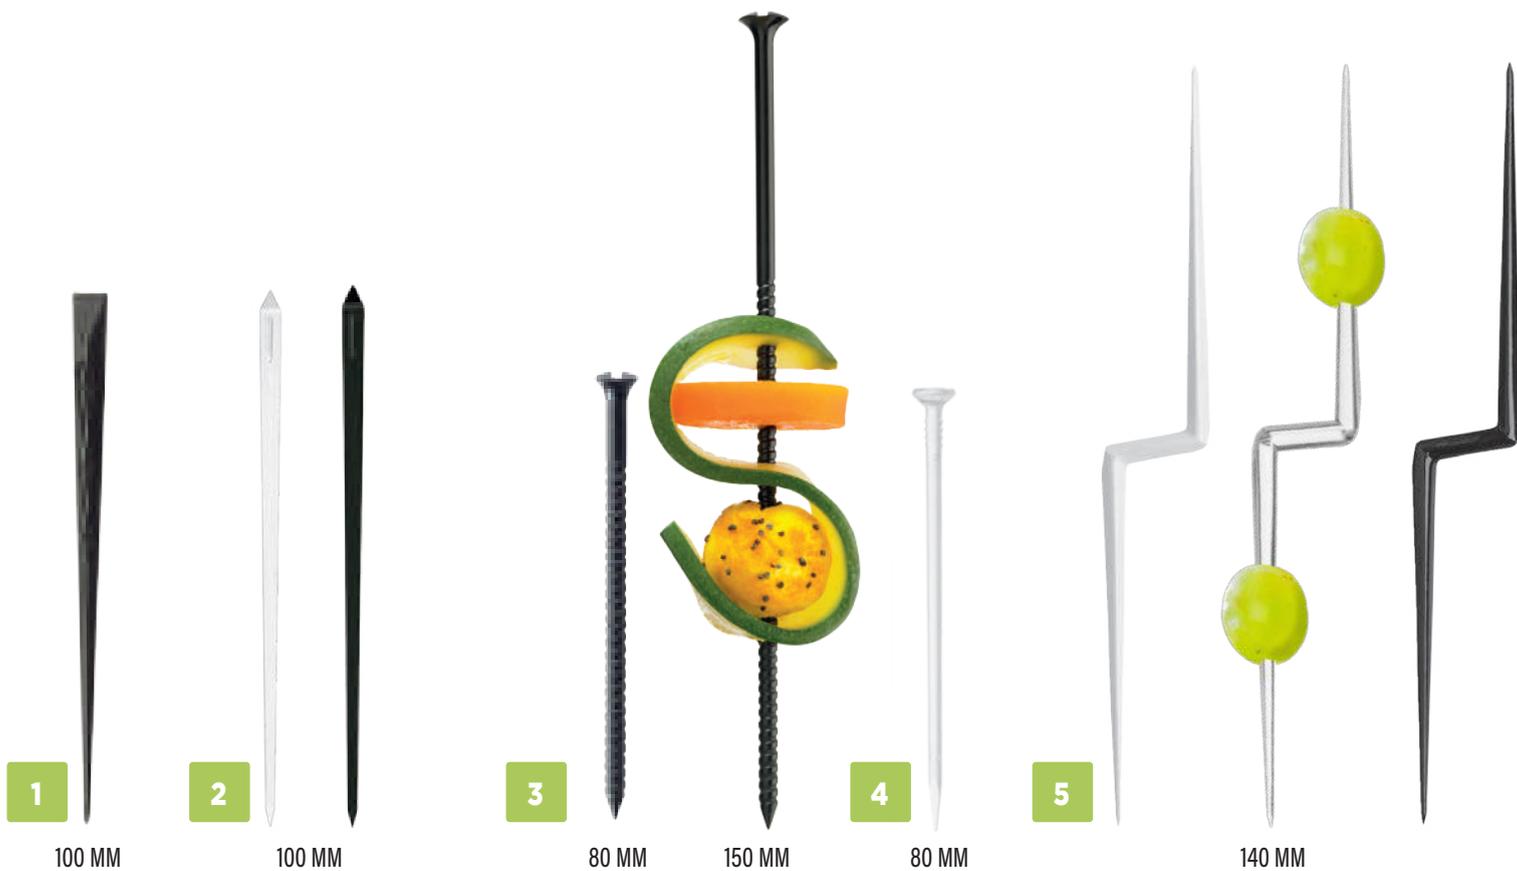

The PS (polystyrene) crystal comes from fossilized material transformed into granules. The main advantage of PS is that it is reusable and it contributes to a circular economy.

Our PS products have been tested and certified for dishwasher and be used several times : today we guarantee a minimum of 20 washings for our products designed in PS.

For recycling, plastic packaging made of polystyrene (PS) is sorted, crushed, and then roughly cleaned. After a very precise technical conversion process, these crystals are then washed and heated to a very high temperature to turn into plastic granules. Then the granules are recycled for a new production, a new life.

# DISPLAYS

---

Nowadays, the presentation of your receptions and buffets is the best ambassador for your brand image. Your brand deserves the quality and design of our wood, metal, cardboard or PMMA displays.

This year, we are enhancing our artisan range, manufactured locally in Aude.

Discover our new collection of wood and metal displays:

the Conik tray, the Uni 10 display, the reversible Madera tray for cocktail sticks or lollipops, the Balasto display or the nested tables...

...so many new, reusable and environmentally friendly product lines!

Just imagine your gastronomic display!

SBN175

5

56 CM

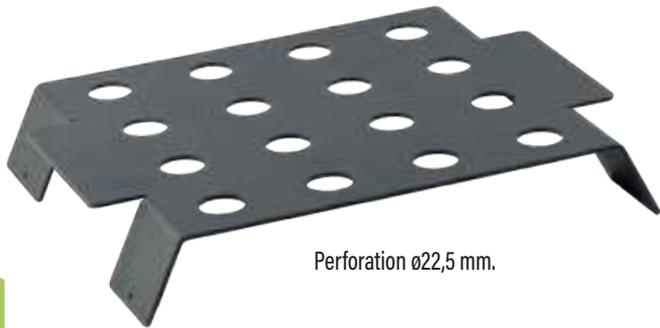

Wrought iron handmade display, round, black color, satin finish. Its hooked branches allow the positioning of 5 wood trays made of oak plywood (Ø35 cm x2 + Ø28 cm x3, width: 9 mm). The structure is equipped with threaded rods for an easier and faster trays' assembly. It cannot be bent. Moderate the tightening so as not to damage the fixing.

# GENERAL TERMS AND CONDITIONS OF SALE

## 1 – GENERAL POINTS

1-1 Unless expressly agreed in writing by us, our sales are subject to the following general terms and conditions, which cancel any contrary clause appearing in the purchase orders, general terms and conditions of purchase or correspondence of our customer.

1-2 The information contained in our catalogues, prospectus, etc. is provided for information only and may not in any way be considered an offer on our part. The goods offered for sale in our catalogues and on our website [www.comatec.fr](http://www.comatec.fr) are described and presented as accurately as possible. However, if despite our best efforts, errors occur, no compensation shall be paid to the customer on account of this.

1-3 Our sales are exclusively reserved for professionals, acting within their professional capacity, to the exclusion of all sales to consumers.

## 2 – ORDERS

2-1 We reserve the right to amend these general terms and conditions at any time and without prior notice. The general terms and conditions applicable to the customer shall be those appearing in our catalogues or on our website on the date the customer places the order.

2-2 Samples of goods can be sent to the customer upon request. We reserve the right to invoice these samples according to the quantity and destination.

## 3 – AVAILABILITY

3-1 The products in our catalogues and on our website are subject to availability.

3-2 In this regard, information on goods availability shall be provided to the customer at the time of ordering. We shall not be held liable for any error relating to availability. If the goods ordered are not available, we shall inform the customer immediately by telephone, email or fax.

## 4 – DELIVERY / DEADLINES / COMPLIANCE

4-1 The delivery terms depend on the destination country and the nature and volume of the order.

4-2 Goods shall be delivered within mainland France within around 72 hours (3 working days) for orders placed before 1pm. The customer must contact us to arrange express delivery within 24 or 48 hours (at an additional cost) and for delivery to any island, French overseas department or territory or abroad.

Our delivery deadlines are provided for information only. Orders may not be cancelled or the goods declined in case of possible delay and no damages shall be paid.

4-3 We reserve the right to deliver in instalments.

4-4 A delivery note shall be provided to the customer to be signed on collection and/or delivery of the goods.

4-5 On delivery and in the presence of the carrier, the customer must check the packages (poorly wrapped or torn pallets, damaged packages, poorly loaded, etc.). In case of damage, written reservations must be provided to the carrier on the delivery note. The customer must inform the carrier of the reservations recorded on the delivery note and any new reservations by registered letter with acknowledgment of receipt within three (3) days, excluding bank holidays, in order to take action against the carrier under the terms of article 133-3 of the French Commercial Code.

## 5 – GUARANTEE / COMPLAINT / NON-COMPLIANCE

5-1 The customer must check the compliance of the goods delivered within 72 hours of receipt. In the absence of written complaint (by email) within this deadline, the customer shall be deemed to have acknowledged the compliance of the goods with the order. We shall not guarantee any defect on which the customer fails to act within the 72-hour deadline.

5-2 In case of non-compliance, the customer must send, within the aforementioned 72 hours, a complaint specifying the item(s) concerned, the nature of the defect, the quantity concerned, the batch or box number and photos.

5-3 The customer must retain at his own expense all or part of the non-compliant goods until we collect them or until we authorise their destruction.

5-4 The prior agreement of our commercial services is necessary prior to any return of non-complaint and/or defective goods. The costs for returning the non-complaint and/or defective goods shall be borne by us.

5-5 In case of non-compliant goods, we shall draw up credit note on receipt of the returned goods to our services exclusively on one or more wrapped pallets.

5-6 We shall not be held liable for any indirect damages whatsoever suffered by the customer, including but not limited to, loss of revenue, turnover, shortfall, damage to brand image.

5-7 In all cases, our liability shall be limited to the amount paid by the customer for the non-compliant goods.

5-8 Any action by the customer against us in relation to the compliance of goods shall be lodged within one year of the date of the discovery giving rise to the action.

## 8 – PAYMENT METHODS

8-1 From 1st January 2019 all invoices will be sent by email, a faster and environmentally friendly way of receiving and managing your invoices.

Kindly download the following form : <http://en.comatec.fr/demat> and send it back to [facturation@comatec.fr](mailto:facturation@comatec.fr) .

8-2 Unless agreed to the contrary by our accounts department, invoices must be paid by debit/credit card or bank transfer prior to delivery. With the agreement of our accounts department, we can accept payment within 30 days, by transfer or debit/credit card.

8-3 No discount shall be offered to the customer for early payment, in the absence of exceptional agreement.

8-4 In no case may the customer on his own initiative offset sums owed to him against sums owed to us for the purchase of goods.

8-5 We may at any time offset sums owed to the customer as discounts or rebates against sums owed to us.

## 9 – LATE / MISSING PAYMENT

9-1 Any delay in payment authorises us to suspend all current orders and deliveries and amend the terms agreed prior to the issue, without prejudice to any other course of action.

9-2 Any delay in payment, in the absence of exceptional deferment agreed in writing, shall lead to the automatic issuing of a late payment penalty equal to three times the legal interest rate in force, as well as a flat-rate penalty for recovery costs of 40 euros. The late payment interest runs from the payment due date to the collection date.

9-3 Failure to pay a single invoice on its due date shall lead to all our invoices becoming immediately payable.

9-4 Any invoice recovered through the courts may, by way of a penalty within the meaning of article 1229 of the [French] Civil Code, have compensation added to it fixed at the flat-rate of 10% of the outstanding sum, in addition to the legal recovery costs and late-payment interest. All legal and/or court costs resulting from late payment shall be borne by the customer.

## 10 – FORCE MAJEURE

10-1 We reserve the right to suspend and/or cancel orders without compensation in case of force majeure preventing normal operation.

10-2 Events of full strike, lock-out, fire, flood, damage to equipment, riot, delayed delivery from our suppliers, loss of driving power, either by us or our suppliers or carriers, shall be deemed to be cases of force majeure, even if only partial.

## 11 – LIABILITY

The goods offered comply with the French legislation in force and with the standards applicable in France. We shall not be held liable for imports of our goods to third party countries. It is the responsibility of the customer to ensure that our goods comply with local import or usage regulations.

## 12 – TERMINATION CLAUSE

We can demand the termination of the order if the customer breaches any one of his commitments. In this case, we must give the customer formal notice, by registered letter with acknowledgment of receipt, to respect his commitments, giving him fifteen days to do so. On expiry of this deadline, if the customer has not complied with his obligations, we can confirm the termination of the order also by registered letter with acknowledgment of receipt.

## 13 – INTELLECTUAL PROPERTY

The customer undertakes not to depreciate or damage, in any way whatsoever, the brands, logos and other distinctive marks appearing on our goods. We alone own the intellectual property rights (designs and models, copyrights, etc.) appearing on the goods.

No provision hereof or sale of goods can be deemed as transferring the intellectual property rights for the goods to the customer, unless stipulated to the contrary, and duly agreed by us. The customer is prohibited from placing any intellectual property right on the goods in France or abroad. Prosecution for counterfeiting shall be brought against any reproduction or imitation of the goods without our authorisation in accordance with the provisions of the French Intellectual Property Code.

## 14 – DATA PROTECTION

As part of our activities, we may be required to collect and process certain personal data on natural persons. In accordance with the law of 6 January 1978 on data protection, the customer has the right to access, amend, rectify and delete his data. To exercise this right, the customer can contact us by email: [contact@comatec.fr](mailto:contact@comatec.fr) or by mail: COMATEC, ZI Lannolier, Bd François-Xavier Fafeur, 11000 Carcassonne, France.

## 15 – CONFIDENTIALITY

The customer undertakes to keep all the information and documents we send him within the context of these general terms and conditions confidential and not to disclose them to third parties without our prior agreement. This confidentiality commitment shall remain valid during commercial relations and at the end of these relations for a period of five (5) years.

## 16 – DISPUTES

These general terms and conditions shall be subject to French law, the parties having expressly agreed to exclude the provisions of the international Vienna Convention of 1980 on the international sale of goods. For all disputes, and in the absence of amicable agreement, only the courts of our registered office shall be competent to hear the dispute, irrespective of the delivery location, even in case of multiple defendants or the introduction of third parties.

## 17 – MISCELLANEOUS

17-1 Any amendment to these general terms and conditions shall take place by means of written amendment signed by us and the customer.

17-2 In case of contradiction between these terms and conditions and a translation in a foreign language, only the French version shall prevail.

# SERVICES+

## **Design department**

A creation, an original idea deserves unusual packaging. Our design department offers to evaluate your project in order to provide you a solution that meets your expectations.

## **Individual packing**

Our teams produce your individual products: your dining sets with your personalized napkins or your fully assembled trays

## **Production according to customer specifications**

We can personalize some of our products through pad printing, offset printing or engraving. Subject to minimum order quantity, we can also offer bespoke items and concepts. We can help you to develop your brand, to create your design !

## **Samples**

Our samples in reasonable quantities are free of charge except the displays and some other products. For any further information, please contact our export department.

## **ESAT**

To surpass ourselves also means to considerate people, places of production, manufacturing methods and tools. For 12 years, we were the first employer of ESAT (service for work assistance for people with disability) in Aude, where, for example, we make table sets, collect trays, repackaging certain products or carry out individual packaging.

## **Prices List & Deliveries**

For the price quotes and deliveries, please contact our export department. Most of our products are available and our European deliveries can vary within 5-10 days. For any urgent request, we can provide express deliveries at specific rates.
