First rating of our packaging materials

PLANETSCORE® was born from the idea to offer more transparency concerning the material we choose for our packaging.

Thanks to the five-letter logo (A, B, C, D and E), each product in our catalogue is presented on a five-level scale in accordance with specified criteria:

- The most environmentally friendly product in terms of its environmental impact (classified by letter A+): for example, WoodBox range, due to its origin from French eco-forests and its combustion, which contributes to high energy regeneration.
- The least environmentally friendly product: for example a PS packaging produced outside Europe (rated D) due to its carbon footprint (long distance) and to insufficient recycling facilities.

By choosing COMATEC, you are supporting our commitments !

www.planetscore.eu

Winner of the SEPTUORS of Aude 2021 - Category SUSTAINABLE DEVELOPMENT

PlanetScore®, our 10 criteria

Created by COMATEC in 2020, **PLANETSCORE®** is the **first rating** in the packaging industry able to score the sustainability of a product created, selected or distributed by COMATEC.

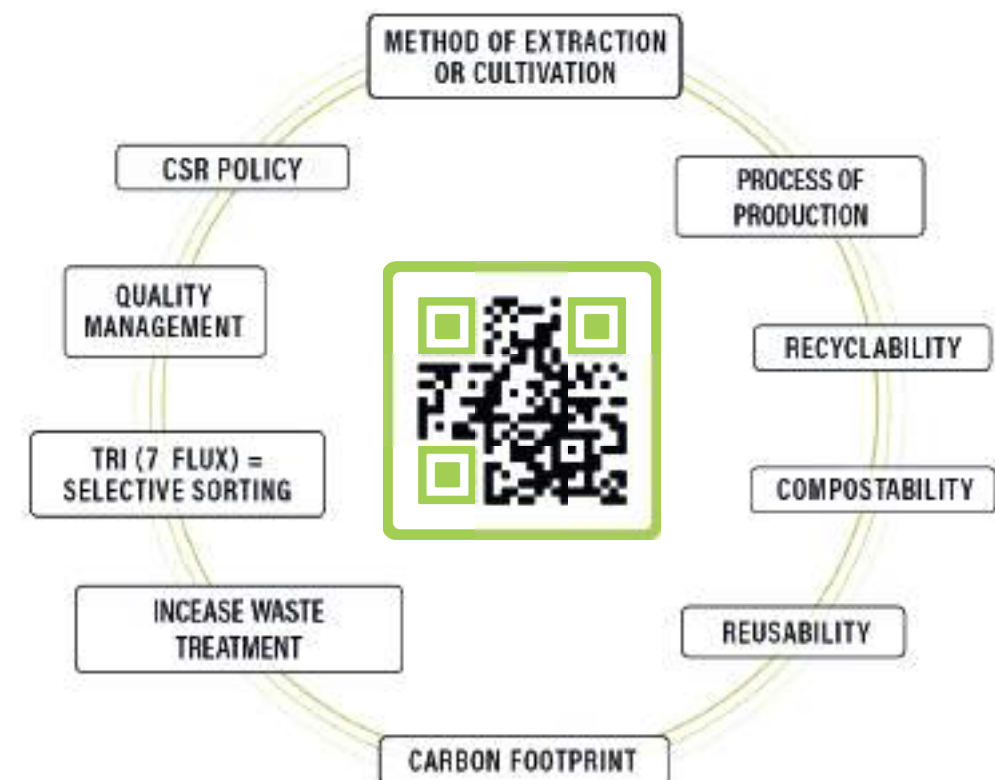

In 2021, we extended our scoring system up to 1000 points, in order to analyse more precisely the impact of our ten criteria.

For our clients:

- An **intuitive letter scale rating** (A, B, C, D and E) based on ten detailed criteria regarding sustainability, products rated A being the most virtuous.
- A **guide** for catering professionals to benchmark products and choose the most eco-friendly solution.

For COMATEC:

- A **tool** for our R&D department to constantly identify new materials or new production processes, in order to upgrade our packaging. Today, our top 100 best-sellers have a score of A, B or C, and over 20% of the whole range is rated A+ or A.
- An **argument** to help promote the development of new recycling channels with local and governmental authorities.

REUSABLE

RECYCLABLE

BIODEGRADABLE

OK INDUSTRIAL COMPOST

OK HOME COMPOST

CUSTOMISABLE

Until STOCK EXHAUSTION

Made in FRANCE / EUROPE

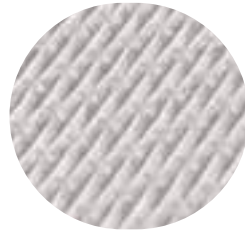

Refers to material that will partially or fully enter a reproduction cycle, reducing the use of pure raw material.

Means a product that can easily decompose under the influence of living organisms without the addition of chemicals and without harmful effects on the environment. The duration of biodegradability will depend on the amount of oxygen, humidity and temperature.

Relates to products which are biodegradable, and which can be changed into compost using an industrial process. Specific standards are applied (temperature 75-80°, humidity rate 65-70% and oxygen rate 18-20%). In these conditions, the composting process takes around 12 weeks. EN13432 standard.

Refers to the same characteristics than Industrial Compost, but with a major difference: the product is compostable at a lower temperature, and therefore can be placed in a domestic compost bin, hence the Home Compost designation.

Bagasse

Bagasse is a natural material, derived from sugar cane fibre: the cellulose of the plant is grinded and the juice is recovered to make sugar. One tonne of sugar cane yields about 300 kg of bagasse. Our bagasse is produced in China. It is a 100% renewable resource, since its consumption does not exceed its biological recovery. Sugar cane grows back between 10 and 16 months, depending on the growing conditions. It needs a lot of water, but its yield is interesting and its life span is 10 years. If there was a disadvantage to sugarcane fibre, it would be its supply time and its remote processing location. We propose it in the form of cutlery, bowls, verrines, plates and trays.

Bamboo

Bamboo is a woody grass of the Phyllostachys Heterocyclus variety. It grows mainly in forests, 65% of which are in Asia. Our supplies come from China. Bamboo grows very quickly and requires little water. Bamboo binds 30% more CO2 than hardwoods, and therefore releases 30% more oxygen. The material is very strong, light and reusable. We propose it in the form of cutlery, verrines, sticks, straws and trays.

Wood

Poplar (Populus Salicaceae) or pine (Pinaceae) **wood** comes from different forests around the world. Poplar plantations are an excellent carbon sink, so let's give them priority. For the Madera and the Wood Box ranges, we select our poplar wood exclusively from French forests that are sustainably managed. It is a neutral wood that does not transmit any taste or odour and is perfectly suited to food contact. Once used, wood is often recovered as energy (after sorting and crushing), or as chips for mulching the soil or as many other wood-based products. This material is a part of our environmental approach.

Cardboard • Paper

Cardboard is a vegetal fibre from trees, which is converted into cellulose, and then into paper which can be layered to make cardboard. Most of these fibres come from eco-managed forests. We supply our paper and cardboard mostly from France and Spain. We favour this material for our eco-designed products as the recycling facilities are highly organised and performant: in Europe 85% of cardboard waste are recycled (68% in France). One tonne of recycled paper saves 2.5 tonnes of wood.

Straw

Our natural **straws** are made from real wheat straws. They may have some natural imperfections. It's a renewable, biodegradable and compostable resource. They are heat resistant and therefore suitable for both cold and hot drinks.

Palm leaf

When we talk of **palm**, we mean the leaf sheath of the betel palm (family Arecaceae). The leaves, which are bound to the bark of the tree, fall off naturally, are cleaned, dried and then thermoformed. No processing or additives are added to produce the plates or other products. The material is 100% natural, waterproof and heat resistant. Compostable and biodegradable, the palm leaf is an ideal resource to meet our ecological concerns. If there was a disadvantage to palm leaf sheath, it would be its remote growing location, as it comes from India. But we choose local fair trade cooperatives.

Metal • Stainless Steel

Stainless steel 18/8 is a low carbon steel, to which is added 18% chromium and 8% nickel. It is considered as a green material as it is recyclable an infinite number of times, and environmentally neutral. Easy to clean, unbreakable, qualitative, reusable and sustainable, stainless steel is very trendy, and all the more so due to the high recyclability rate (80% in France). Other metal we use are iron oxide and aluminium. The latter is almost endlessly recyclable if transferred to the right waste management facilities.

PET • rPET

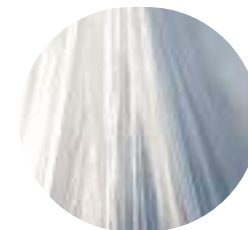

PET (polyethylene terephthalate) is a fossil material transformed to manufacture packaging by injection or thermoforming. The main advantage of PET or rPET is its endless recyclability. For recycling, PET packaging is flattened into plastic bales and sent to a regeneration and recycling plant. The bales are then cleaned, crushed and softened. Following a precise technical transformation process, they become flakes of different colours. These flakes are then washed and heated to a very high temperature to be transformed into plastic granules. The granules are then sent for a new production. To reduce the use of pure material, we are increasingly using recycled **PET (rPET)**. We favour this material because it guarantees food safety and financial reliability. We believe that PET is a key part of the circular economy and we strongly recommend its usage. Thanks to our sourcing and production in France, we are able to guarantee 100% traceability.

PP • PP/talc

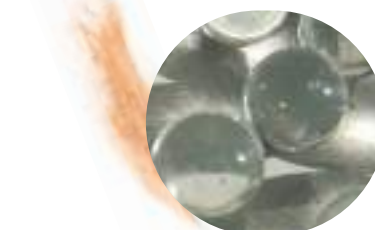

PP (polypropylene) is made from a fossil material that is converted into granules. At Comatec, ecodesign also involves reducing the use of fossil raw materials. By adding food-grade **talc** to PP, and thanks to our French know-how, we reduce the use of plastic by 20%, obtaining high quality products that are more rigid. Our PP containers are certified washable, reusable and recyclable. For recycling, PP plastic packaging is sorted, crushed and roughly cleaned. These flakes are washed and heated to a very high temperature to turn them into plastic granules. These granules are then sent for a new production.

PS

PS (polystyrene) is made from fossil material transformed into granules. The main advantage of PS is that it is transparent, light, but also reusable and recyclable, so it contributes to the circular economy. Our PS products have been tested and certified for reuse and machine washing: we guarantee at least 20 washes for our PS products. For recycling, polystyrene (PS) plastic packaging is sorted, crushed and roughly cleaned. These flakes are then washed and heated to a very high temperature to form plastic granules in a very precise technical process. They are then sent for a new production. Our PS products are certified washable, reusable and recyclable.

Glass

Glass is mainly composed of a mixture of sand, soda and limestone. We source it from France, Spain and China. There are 2 different qualities of glass:
• **Borosilicate glass**, made of 80% silica, is characterised by its high resistance to mechanical and thermal shocks (over 300°C).
• **Soda-lime glass**, made of 70% silica, is used in most industrial products for food use (bottles, jars, etc). It is more delicate and sensitive to thermal variations. Glass has a strong advantage: it can be 100% endlessly recycled. Despite its weight and the energy required to melt it (1400°C), glass is so much reused in its original form that it could be classified as a green material. In France, up to 74% of glass products are recycled.

*Do today...
what others will do tomorrow*

TAKEAWAY

MEAL TRAYS

THEMA - LIDS

Thema meal trays offer a wide range of possibilities for colourful solutions to suit all your needs:
choose your lid, base and plate kit
from the wide selection available (P.14)

Customisation of the lids:

- by inserting your business card in the slot
- by printing your logo (from 5 000 units).

Mandarin, vanilla, apple green lids: rigid cardboard

White lid with PVC window (270 x 215 mm):
cardboard/pvc

Black/fuchsia reversible lid: flexible cardboard

Kraft lid: rigid cardboard

BALUBAG

With Balubag, COMATEC offers a contemporary version of the baluchon.
By tying the fabric according to the inspiration of the moment, you can easily carry your meals. Balubag can be used as a table runner or a small picnic tablecloth.
An inside pocket allows you to insert your accessories.

BLOOM - CARDBOARD

With the BLOOM collection, Comatec launches two models of flower-shaped boxes, Lily and Magnolia, which are transformed into boxes with a pure and poetic design, thanks to an ancestral folding technique. Suitable for food contact and resistant to sauces or condiments, their self-locking closure mechanism and their highly stable structure preserve their content and guarantee safe transport. Easy assembly thanks to preformed folding. Flat storage.

WOODBAKER - WOOD

New

Available
in April

These containers made of poplar wood from French forests have a paper cup, making them ideal for baking bread or pastries, but also for salty preparations. The open angles allow heat to pass through and thus cook from the bottom.

MISCELLANEOUS

GENERAL TERMS AND CONDITIONS OF SALE

1 – GENERAL POINTS

1-1 Unless expressly agreed in writing by us, our sales are subject to the following general terms and conditions, which cancel any contrary clause appearing in the purchase orders, general terms and conditions of purchase or correspondence of our customer.
1-2 The information contained in our catalogues, prospectus, etc. is provided for information only and may not in any way be considered an offer on our part. The goods offered for sale in our catalogues and on our website www.comatec.fr are described and presented as accurately as possible. However, if despite our best efforts, errors occur, no compensations shall be paid to the customer on account of this.
1-3 Our sales are exclusively reserved for professionals, acting within their professional capacity, to the exclusion of sales to consumers.

2 – ORDERS

2-1 We reserve the right to amend these general terms and conditions at any time and without prior notice. The general terms and conditions applicable to the customer shall be those appearing in our catalogues or on our website on the date the customer places the order.
2-2 Samples of goods can be sent to the customer upon request. We reserve the right to invoice these samples according to the quantity and destination.

3 – AVAILABILITY

3-1 The products in our catalogues and on our website are subject to availability.
3-2 In this regard, information on goods availability shall be provided to the customer at the time of ordering. We shall not be held liable for any error relating to availability. If the goods ordered are not available, we shall inform the customer immediately by telephone, email or fax.

4 – DELIVERY / DEADLINES / COMPLIANCE

4-1 The delivery terms depend on the destination country and the nature and volume of the order.
4-2 Goods shall be delivered within mainland France within a round 72 hours (3 working days) for orders placed before 1 pm. The customer must contact us to arrange express delivery within 24 or 48 hours (at an additional cost) and for delivery to any island, French overseas department or territory or abroad.
Our delivery deadlines are provided for information only. Orders may not be cancelled or the goods declined in case of possible delay and no damages shall be paid.
4-3 We reserve the right to deliver in instalments.
4-4 A delivery note shall be provided to the customer to be signed on collection and/or delivery of the goods.
4-5 On delivery and in the presence of the carrier, the customer must check the packages (poorly wrapped or torn pallets, damaged packages, poorly loaded, etc.). In case of damage, written reservations must be provided to the carrier on the delivery note. The customer must inform the carrier of these reservations recorded on the delivery note and any new reservations by registered letter with acknowledgment of receipt within three (3) days, excluding bank holidays, in order to take action against the carrier under the terms of article 133-3 of the French Commercial Code.

5 – GUARANTEE / COMPLAINT / NON-COMPLIANCE

5-1 The customer must check the compliance of the goods delivered within 72 hours of receipt. In the absence of written complaint (by email) within this deadline, the customer shall be deemed to have acknowledged the compliance of the goods with the order. We shall not guarantee any defect on which the customer fails to act within the 72-hour deadline.
5-2 In case of non-compliance, the customer must send, within the aforementioned 72 hours, a complaint specifying the item(s) concerned, the nature of the defect, the quantity concerned, the batch or box number and photos.
5-3 The customer must retain at his own expense all or part of the non-compliant goods until we collect them or until we authorise their destruction.
5-4 The prior agreement of our commercial services is necessary prior to any return of non-complaint and/or defective goods. The costs for returning the non-complaint and/or defective goods shall be borne by us.
5-5 In case of non-compliant goods, we shall draw up a credit note on receipt of the returned goods to our services exclusively on one or more wrapped pallets.
5-6 We shall not be held liable for any indirect damages whatsoever suffered by the customer, including but not limited to, loss of revenue, turnover, shortfall, damage to brand image.
5-7 In all cases, our liability shall be limited to the amount paid by the customer for the non-compliant goods.
5-8 Any action by the customer against us in relation to the compliance of goods shall be lodged within one year of the date of the discovery giving rise to the action.
5-9 The buyer must ensure that the products comply with the existing legislation in his/her country.

6 – PAYMENT METHODS

6-1 From 1st January 2019 all invoices will be sent by email, a faster and environmentally friendly way of receiving and managing your invoices. Kindly download the following form : <http://en.comatec.fr/demat> and send it back to facturation@comatec.fr.

6-2 Unless agreed to the contrary by our accounts department, invoices must be paid by debit/credit card or bank transfer prior to delivery. With the agreement of our accounts department, we can accept payment within 30 days, by transfer or debit/credit card.
6-3 No discount shall be offered to the customer for early payment, in the absence of exceptional agreement.
6-4 In no case may the customer on his own initiative offset sums owed to him against sums owed to us for the purchase of goods.
6-5 We may at any time offset sums owed to the customer as discounts or rebates against sums owed to us.

7 – LATE / MISSING PAYMENT

7-1 Any delay in payment authorises us to suspend all current orders and deliveries and amend the terms agreed prior to the issue, without prejudice to any other course of action.
7-2 Any delay in payment, in the absence of exceptional deferment agreed in writing, shall lead to the automatic issuing of a late payment penalty equal to three times the legal interest rate in force, as well as a flat-rate penalty for recovery costs of 40 euros. The late payment interest runs from the payment due date to the collection date.
7-3 Failure to pay a single invoice on its due date shall lead to all our invoices becoming immediately payable.
7-4 Any invoice recovered through the courts may, by way of a penalty within the meaning of article 1229 of the [French] Civil Code, have compensation added to it fixed at the flat-rate of 10% of the outstanding sum, in addition to the legal recovery costs and late-payment interest. All legal and/or court costs resulting from late payment shall be borne by the customer.

8 – FORCE MAJEURE

8-1 We reserve the right to suspend and/or cancel orders without compensation in case of force majeure preventing normal operation.
8-2 Events of full strike, lock-out, fire, flood, damage to equipment, riot, delayed delivery from our suppliers, loss of driving power, either by us or our suppliers or carriers, shall be deemed to be cases of force majeure, even if only partial.

9 – LIABILITY

The goods offered comply with the French legislation in force and with the standards applicable in France. We shall not be held liable for imports of our goods to third party countries. It is the responsibility of the customer to ensure that our goods comply with local import or usage regulations.

10 – TERMINATION CLAUSE

We can demand the termination of the order if the customer breaches any one of his commitments. In this case, we must give the customer formal notice, by registered letter with acknowledgment of receipt, to respect his commitments, giving him fifteen days to do so. On expiry of this deadline, if the customer has not complied with his obligations, we can confirm the termination of the order also by registered letter with acknowledgment of receipt.

11 – INTELLECTUAL PROPERTY

The customer undertakes not to depreciate or damage, in any way whatsoever, the brands, logos and other distinctive marks appearing on our goods. We alone own the intellectual property rights (designs and models, copyrights, etc.) appearing on the goods. No provision hereof for sale of goods can be deemed as transferring the intellectual property rights for the goods to the customer, unless stipulated to the contrary, and duly agreed by us. The customer is prohibited from placing any intellectual property right on the goods in France or abroad. Prosecution for counterfeiting shall be brought against any reproduction or imitation of the goods without our authorisation in accordance with the provisions of the French Intellectual Property Code.

12 – DATA PROTECTION

As part of our activities, we may be required to collect and process certain personal data on natural persons. In accordance with the law of 6 January 1978 on data protection, the customer has the right to access, amend, rectify and delete his data. To exercise this right, the customer can contact us by email: contact@comatec.fr or by mail: COMATEC, ZILannolier, Bd François-Xavier Fafeur, 1 1000 Carcassonne, France.

13 – CONFIDENTIALITY

The customer undertakes to keep all the information and documents we send him within the context of these general terms and conditions confidential and not to disclose them to third parties without our prior agreement. This confidentiality commitment shall remain valid during commercial relations and at the end of these relations for a period of five (5) years.

14 – DISPUTES

These general terms and conditions shall be subject to French law, the parties having expressly agreed to exclude the provisions of the international Vienna Convention of 1980 on the international sale of goods. For all disputes, and in the absence of amicable agreement, only the courts of our registered offices shall be competent to hear the dispute, irrespective of the delivery location, even in case of multiple defendants or the introduction of third parties.

15 – MISCELLANEOUS

15-1 Any amendment to these general terms and conditions shall take place by means of written amendments signed by us and the customer.
15-2 In case of contradiction between these terms and conditions and a translation in a foreign language, only the French versions shall prevail.

SERVICES +

■ Design department

A creation, an original idea deserves an outstanding packaging. Our design office will evaluate your project in order to provide you with a solution that meets your expectations.

■ Individual packing

Our teams package your customised products: cutlery kits with your personalised napkins or fully assembled meal trays.

■ Customisation

We can personalise some of our products by pad printing, offset or engraving.
Subject to minimum order quantity, we can also offer bespoke items and concepts.
We can help you to develop your brand and to create your design!

■ Samples

Our samples in reasonable quantities are free of charge except the displays and some other products. For any further information, please contact our export department.

■ ESAT*

To surpass oneself also means paying attention to the people, the production sites, the methods and the manufacturing tools. For the past 25 years, we have been the leading ESAT employer in the French Aude region for the production of cutlery kits, the assembly of meal trays, the repackaging of certain products and customised packaging (ESAT sites in Carcassonne, Limoux, Pennautier and Rieux-Minervois).

* Work assistance service for people with disabilities.

■ Price lists and deliveries

For the price quotes and deliveries, please contact our export department. Most of our products are available and our European deliveries can vary from 5 to 10 days. For urgent request, we can provide express deliveries at specific rates.
