

A bamboo plant with green leaves and a yellowish-green flower spike is positioned behind a circular graphic. The graphic consists of a white inner circle and a light green outer ring, both centered on a textured, light brown background.

**NATURE
IN ITS FINEST
FORM.**

NATURE IN ITS FINEST FORM.

ON THE SAME PAGE AS NATURE. INDEX OF CONTENTS.

These 120 pages you're holding in your hand are filled with well over 600 perfect solutions from nature. The entire naturessa range is made entirely of fast-growing renewable raw materials. Some of these are unused residual materials from agriculture that would otherwise be discarded or go to waste; others are based on rapidly renewable raw materials derived from plants, such as the incredibly fast-growing bamboo. The raw materials used are 100 percent biodegradable and climate-friendly. All products developed from them

are absolutely plastic-free, conserve finite fossil resources, feature impressive design quality and offer excellent functionality.

Our main catalogue gives you an overview of the standard products we have in stock, made from seven raw material groups. Virtually every requirement is catered to with the natural plates, bowls, dishes, lids, cups, glasses, drinking straws and cutlery. And much more is possible. Ask us if you want nature in a different shape!

THE NATURESSE PROMISE

«**Nature in its finest form**» – a promise that could not be more clear. It emphasises aesthetics as well as respect for nature, and it makes it clear that nature provides us with the perfect solutions for our every need.

naturesse is the future. And has been since 2003. We've had the answers to the plastic ban on individual product groups, which comes into force in the EU from mid-2021, for almost 20 years now. With a complete, comprehensive range of well over 600 permanently available products made from renewable raw materials, plus a wealth of bespoke customer solutions, naturesse is ready for a sustainable world. A world in which alternatives to petroleum and conventional plastics, as well as use of natural concepts, are gaining in importance. Ultimately, the aim is to conserve the

earth's finite resources and reduce the amount of plastic waste – which of course works best with 100% biodegradable materials from rapidly renewable resources.

We present to you with nature in its finest form: disposable products and food packaging that are sustainable and aesthetic, are produced fairly, and satisfy all safety requirements. The honestly earned certificates and labels gained by our audited naturesse products confirm your choice as the right one in social, ecological and food safety terms. It is our pleasure to guide you with personal advice, to offer you flexible and reliable support and to let you benefit from our complete network and knowledge.

WHICH PRODUCT?

For a quick product overview,
see from page 117 on.

WHICH LID?

As a result of a development process over many years, all our lids for food trays are extremely functional, close perfectly, can be stacked and fit our wide assortment of square and round trays. For the **ready-meal delivery service**, the lids were fitted

with reinforced closing mechanisms so that meals containing liquids such as soups or sauces can be transported without any worries. Please note the types 1–4, which are also labelled as such in the catalogue.

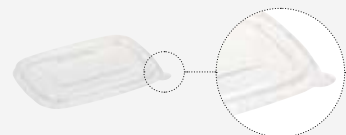

COLD APPLICATIONS MADE OF PLA

Application: –18 to +40 degrees

Colour: transparent

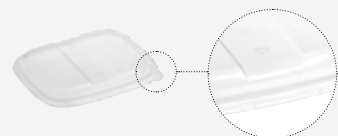

TYPE 1

PLA lid, transport-friendly
with notch

TYPE 2

PLA lid, transport-friendly
with notch and recess for wrapper

COLD AND HOT APPLICATIONS, MADE OF SUGAR CANE

Application: –25 to +200 degrees

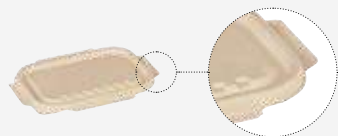

Properties: microwave-safe, insulated

Colour: white or nature

TYPE 3

Sugar cane lid, transport-friendly
with patented napac wing locking system

COLD AND HOT APPLICATIONS, MADE OF KRAFT

Application: –25 to +85 degrees

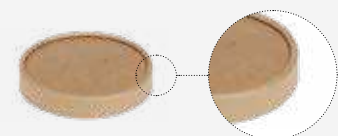

Properties: microwave-safe, insulated

Colour: brown

TYPE 4

Kraft lid, transport-friendly
with SnapOn lid and steam vent

WHICH CERTIFICATES?

Some products and product groups are specially certified; this is indicated by the various symbols. The certificates are explained on page 109.

**Biodegradable
to DIN EN 13432**

**Certified
food-safe**

**Fair
working conditions**

**From sustainable
forestry**

**Dishwasher-safe
to DIN EN 12875**

WHEN A PALM TREE DELIVERS THE PLATES

Only when the leaves of the betel palm die and fall to the ground do we gather them up and shape them into natural disposable tableware. Our naturessse palm leaf products are processed at source – a sensible choice both for the environment and for us humans. This means that your tableware is environmentally friendly, fairly produced and 100 percent biodegradable.

Palm leaf A GIFT FROM NATURE

01

*Raw material
betel palm*

02

*Dried palm
leaf sheath*

03

Finished product

The green leaves of the betel palm grow at heights of up to 25 metres above the ground. Once they lose their natural moisture and dry out almost completely, they **fall to the ground on their own** and can then be processed further. Any overexploitation is prevented in a natural way, because the green leaves still contain too much moisture and would quickly develop mould. Instead of leaving the fallen leaves to wither and rot on the ground, they are now shaped into superb disposable tableware.

Palm leaf products are ovenproof, food-safe and grease- and heat-resistant – all **without any additional coatings or the need for any additives**. The disposable tableware produced in this way remains 100 percent biodegradable. The particularly elegant style is also the work of nature: since each palm leaf has its

own uniquely elegant pattern of veins, any product made from it, is a uniquely stylish one-of-a-kind item.

The betel palm is grown in mixed culture, which preserves the soils. The natural palm leaf production in a small village in south-west India is carried out under **audited, fair conditions** and meets high social standards (certified to SA 8000). With the processing taking place locally, the inhabitants of an entire region can use their own resources to build up a lasting livelihood for themselves. Our palm leaf products are also certified according to **DIN EN 13432**.

SUGAR CANE

KEEPING THE ENVIRONMENT SWEET

Many people have a sweet tooth, and so does the environment. When sugar is obtained from sugar cane, a valuable biomass is created that usually goes to waste. This we now use to create the disposable tableware of the future: 100 percent natural, 100 percent biodegradable and environmentally friendly.

Sugar cane SWEET INNOVATION

01

*Raw material
sugar cane straw*

02

*Extracted
plant fibres*

03

Finished product

Our appetite for sweet things is now also compatible with nature: the sugar cane juicing process produces large quantities of fibres – a **residual material that has previously remained unused**. And yet this biomass is extremely valuable for the production of natural disposable tableware and packaging. Sugar cane fibres can be used to make stylish products with outstanding properties: tableware made from sugar cane is **lightweight** but still very **robust**. At the same time it is **water resistant**, suitable for cold and hot foods and can be used in microwave, oven and freezer. With a bio-lamination

that creates a stronger grease and water barrier, the sugar-cane bowls become sealable and can be closed not only with lids but also with a peelable film in nature quality. This **sustainable full solution** expands the range of applications for sugar cane to the take-away sector, for instance. Production of the 100 percent biodegradable sugar cane range takes place close to the source of the raw materials, which protects the environment additionally by keeping transportation routes to a minimum. Our wide range of sugar cane products is available in light brown and white.

The 100% solution from nature

SIMPLE TO USE, NO LIMITATIONS

Thanks to our 15 years of experience with natural raw materials, **ready meals** can now be served **in a completely sustainable way** and free of plastic: the meal trays, the peelable films and also the matching lids are all made of fast-growing renewable raw materials and are 100% biodegradable. The **naturesse** ready-meal trays are made of sugar cane fibres and generate around 50% less CO₂ during production than conventional trays (made of part-recycled materials). The **bio-lamination**, which is also naturally biodegradable, protects each tray from water and sauces. In combination with our biodegradable and **peelable sealing films**, or with a lid made of PLA or sugar cane fibres, the natural packaging solution is complete. The wide product

range is suitable for every imaginable application and with our easy-to-use sealing machines, ready meals are packed naturally in no time at all.

This sustainable alternative to plastic is ideal for meals with longer holding times, for dressed salads, sauce-based dishes, juicy meals or even for iced desserts. The ready-meal packaging withstands the cold of the freezer as well as the heat of the microwave and oven, and so can also be used for freezing or heating the food. As always, the closure must be removed before reheating.

01 Select *natural product*

✓ Peelable film

Made from
fast-growing
renewable
**RAW
MATERIALS**

✓ Insulating covers made
of sugar cane fibres

- ✓ Optional closure with lid
- ✓ Wide range for **every possible application**

A close-up photograph of several green corn leaves, showing their characteristic parallel veins and wavy edges. The leaves are illuminated by natural light, creating a vibrant green color with some highlights and shadows. The background is blurred, focusing attention on the texture of the leaves.

POLYLACTIC
ACID (PLA)

LOOKS LIKE CONVENTIONAL PLASTIC

Even if they look very similar, the naturesses PLA products have nothing at all to do with conventional plastic. Because instead of using a finite resource, i.e. petroleum, they are made from an inexhaustible resource: natural lactic acid. And since this is obtained from starch derived from sugar cane, the disposable tableware is 100 percent natural, 100 percent biodegradable and eco-friendly.

Polylactic Acid (PLA)

LACTIC ACID AS AN ALTERNATIVE TO PETROLEUM

01

*Raw material, e.g. maize,
manioc and sugar cane*

02

Granulated starch

03

Finished product

The use of plastic is under fire. But we are talking about conventional plastic, which is made from petroleum or polyethylene and is not naturally **biodegradable**. With the natural alternative, lactic acid, plastic-like products can be manufactured that not only have all the positive properties of conventional plastics, but also offer valuable advantages such as complete biodegradability and **climate-friendly** production. The 100 percent natural polylactides, commonly known as polylactic acids or PLA for short, are gained through the fermentation of carbohydrates – such as the starch

derived from fast-growing sugar cane. Soon we will have the capabilities to produce PLA from starch obtained solely from residues of nature.

Our PLA is **transparent, sturdy and shatterproof**. It can also be moulded into almost any shape and even used as a transparent film. Products made of PLA are eminently suitable for cold applications up to 45°C and are **lighter** than conventional materials – with no compromises in terms of function and stability. And in total harmony with nature.

CRYSTALLISED
POLYLACTIC ACID
(CPLA)

PERFECT BECOMES EVEN MORE PERFECT

A transformation that could not have been better. Crystallised polylactic acid (CPLA) is produced by crystallising PLA, a material that is already impressive in its own right. The process makes the biodegradable material additionally heat-resistant and extremely rigid.

Crystallised Polylactic Acid (CPLA)

CRYSTALLISING OUT THE STRENGTHS

01

Raw material
e.g. sugar cane and manioc

02

Granulated starch +
heat and crystallisation

03

Finished product

Sometimes a perfect product can be turned into an even more perfect product by crystallising out further benefits. This is the case with polylactic acid (PLA), which is the raw material for CPLA (crystallised polylactic acid). The crystallisation process brings out further strengths of the natural raw material: CPLA is perfect for **warm applications** and can withstand temperatures up to 85°C, making it ideal for coffee cups, for example. The material also becomes more **rigid**, which makes it possible, among other things, to produce ex-

tremely robust cutlery. Crystallisation makes the CPLA naturally milky in colour. With the addition of colour, the naturess range of cutlery can also be supplied in beige or black, which underscores the **aesthetics**. CPLA is also pleasantly natural to the touch. Pure PLA is used in the naturess CPLA products – no mixed compounds are used. The raw material base is guaranteed GMO-free and is processed into 100 percent biodegradable, stylish products without the addition of petroleum.

AND INTO THE DISHWASHER

Available
from
JUNE
2021

Once the EU ban on single-use plastic cutlery comes into force in July 2021, you can either switch to plastic-free cutlery – such as our wood or paper cutlery – or to reusable cutlery. Thanks to its special rigidity, our newly designed CPLA cutlery is dishwasher-safe to DIN EN 12875 and is made of rapidly renewable raw materials. The cutlery is biodegradable according to DIN EN 13432 and tested for food safety.

CELLULOSE / WOOD

The mark of
responsible forestry

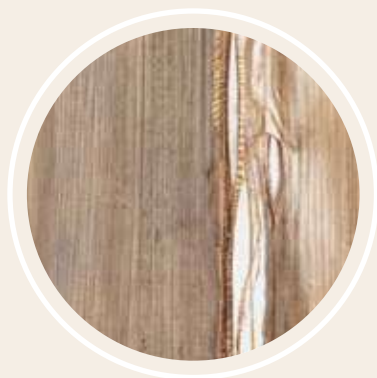

FOR ONCE YOU ARE BARKING UP THE RIGHT TREE

Nature shows us the right path to follow when it comes to avoiding conventional plastics.

It leads us directly into the FSC® forests, where wood and cellulose are harvested for natural packaging. The FSC® certificate guarantees the lasting protection of the forest and the plants and animals that live in it. For tableware that is not only 100 percent natural, but also 100 percent honest.

Cellulose/wood with FSC® certificate A FOREST OF BENEFITS

01

Raw material wood

02

Cellulose fibres

03

Finished product

Cellulose is a perfect raw material for making natural disposable tableware or packaging. But it all depends on where the cellulose comes from. For the production of the 100 percent biodegradable *naturesse* cardboard range, our manufacturers use cellulose from FSC®-certified forests and from controlled sources. The FSC® label is a clear indication that the product originates from responsible forestry and so ensures the **protection of plants, animals, ecosystems**, soils and landscapes. An additional PLA layer, such as that used in our

paper cups, also makes the products **heat and moisture resistant**. In addition to their natural aesthetics, the wood, cardboard and paper products are also custom-printable and offer great freedom for stylish design. The diverse range is 100 percent biodegradable and climate-friendly.

B A M B O O

NATURE'S SPEED RECORD

Bamboo is a wonder of nature. And one that grows extremely fast. The record is around 90 cm ... per day. After harvesting, the stalks re-grow without human intervention. A wonderful basis, in other words, for the production of stylish and functional take-away tableware made of sturdy cardboard – without felling a single tree.

Bamboo

THE GRASSES OF THE FUTURE

01

Raw material
bamboo stalks

02

Extracted
bamboo fibres

03

Finished product

The saying «Trees don't grow into the sky» suggests that all good things come to an end. Bamboo, however, begs to differ. Certain types of bamboo can easily grow **half a metre in a single day** – a height that trees would only reach after many months. Once the bamboo has been cut, these grasses soon grow back again all by themselves. Bamboo needs no pesticides, no chemical fertilisers and **no artificial irrigation** to achieve its tremendous growth. All this is reason enough to make natural take-away tableware

out of it – tree-free. The cellulose of the bamboo fibres can be used to produce very sturdy cardboard that meets all take-away requirements. It has a light, brownish colour by nature. The delicate surface can be perfectly printed and is also a delight to the eye. The type of bamboo used is Moso, i.e. not the staple food of pandas, meaning that their habitat is left intact. The diverse range is 100 percent biodegradable and climate-friendly.

PAPERWISE – A GOOD SIGN

PaperWise stands for the process by which high-quality cardboard is made out of cellulose derived from agricultural residual materials. The PaperWise take-away products use agricultural waste products such as stalks and leaves. This means that no wood from trees is needed to make cardboard.

MATER - BI

BAGS OF NATURAL RESOURCES

Nature would surely love to give all those plastic shopping bags the sack. This is why the carrier bags, pouches and films from naturessse use no conventional plastic at all. Instead they are made from natural vegetable oil and vegetable starch (Mater-Bi). The tear-resistant bag range can even be disposed of via the household compost.

Mater-Bi

SHOPPING BAGS WITH A SECONDARY USE

01

*Raw material vegetable
oil and starch*

02

Granulated starch

03

Finished product

A lot of conventional plastic is still used for shopping. The semi-transparent shopping bags that have been the norm in retail up to now are made from petroleum and normally end up in the waste. Both aspects – bags made with a problematic resource and waste generation – are unnecessary thanks to the ideas of nature and the innovations of naturesses. The naturesses bags, pouches and films are made of a material called Mater-Bi, which is nothing other than a starch blend on the basis

of vegetable oil and vegetable starch. And the result is also strong: the solutions produced from Mater-Bi are **tear-resistant**, very robust and also breathable. As natural products, they return to nature again after use. All naturesses bags are certified to DIN EN 13432 and may be **disposed of in the household compost** without a second thought. This way, a shopping bag can have a second lease of life as a garden waste bag.

MATER-BI

COMPO BOX: ODOURLESS DISPOSAL

Organic kitchen waste quickly starts to smell. This is where our **innovative product solution** comes in. Together with the breathable **Compo Bag**, the **Compo Bag** ensures constant air circulation. As a result it actively prevents unpleasant odours and mildew developing. This solution therefore means you can happily leave your green waste in the Compo Box for up to a whole week.

NATURE AS A GUEST AT YOUR EVENT

Your
**STRONG
PARTNER**

Nature is playing an increasingly important role in the area of events too. For instance, visitors are increasingly expecting a considerate approach to the use of resources, and sustainable catering technology is taken for granted. After all, an event is supposed to be an occasion for positive emotions – and cues from nature are conducive to this.

Pacovis AG – which owns the *naturesse* brand – is pleased to actively support you in the organisation and execution of major events: from our wide range of event products, you choose the right ones for you and benefit not only from an initial delivery of stock, but also from precise supply and stock management. If requested, our staff can support you around the clock at events and guarantee that everything runs smoothly with stylish products from nature.

DISPOSAL – A GOOD QUESTION

One issue that keeps coming up is how to dispose of nature's items properly. After all, the raw materials used are all 100 percent biodegradable. So where should they go when they've served their purpose? Unfortunately, every country, every region and even almost every canton has different requirements and different regulations, so there is not just one simple answer. But one thing is the same everywhere: regardless of whether the products are fermented, composted, biodegraded or incinerated, the nature's items are always more ecologically sound than conventionally produced single-use tableware made from fossil raw materials. The method of disposal plays a lesser role in the sustainability debate.

Our technical experts are happy to advise you. We look forward to hearing from you!

YOUR DESIGN AS AN EXQUISITE TOUCH

Your decision as a company to choose sustainability already meets with widespread approval. You can build on this and associate your brand directly with the natural packaging – by having everything imprinted to your custom design. Draw attention to yourself and give your customers your own design or messages as a delicious side dish.

Whether meal trays, napkins, products for hot and cold drinks or many other forms of single-use packaging made from natural raw materials – we have the expertise to give comprehensive advice on how to best imprint and personalise your items. Because naturally it's a stylish solution you're looking for. But it's also a matter of food safety, industry standards, laws and shelf life. Pacovis has a team of experts who support the customer from the consultation

stage through to the production process and expertly bridge the gap between developers and packaging manufacturers.

The imprintable items are **marked with a symbol** in this catalogue.

A man with short grey hair and a beard is sitting on stone steps. He is wearing a light blue button-down shirt, dark blue jeans, and brown leather shoes. He is holding a brown cardboard coffee cup with a black lid in his right hand and a brown paper sandwich bag in his left hand. A black bag is on the steps next to him. The background shows more stone steps and a blurred building.

OUR RESPONSIBILITY – YOUR SAFETY

We, the owners and all the staff of Pacovis, embrace our responsibility towards people, towards the environment and towards you. This is evident in our efforts to ensure fair working conditions, the care we take with respect to the environment and our great commitment to food safety.

All our suppliers guarantee **socio-ethical** and **ecological** procurement practices in compliance with the ILO conventions. Preference is given to suppliers who are additionally certified compliant with ethical standards such as Sedex, SA 8000 or BSCI. Throughout the entire manufacturing process, we adhere rigorously to all laws, provisions, rules of conduct and industrial standards – labour law, fiscal legislation, European and international law and the core UN conventions.

We take the utmost care in protecting food quality and **food safety** aspects. We comply with and exceed requirements in the areas of food-grade approvals, foodstuffs law and food packaging, and are certified to recognised industrial standards. We fulfil the safety and hygiene requirements in accordance with the GFSI standards HACCP, IFS, BRC, FSSC 22000 and offer you labels such as Sedex, FSC®, ISO 14001, VLOG, Organic Farming Ordinance and several more.

Particularly noticeable is the social and ecological commitment in the products of the *naturesse* brand. Socio-ethical guidelines and ecological procurement are of paramount importance here. In addition to compliance with all specifications and the above certifications, the entire *naturesse* product range is certified to DIN EN 13432, which guarantees residue-free compostability.

**FAIR
AND SAFE,**
guaranteed

CERTIFICATIONS IN BRIEF

OK COMPOST HOME TÜV AUSTRIA

The OK compost HOME logo guarantees that a product is fully biodegradable in garden compost and has no negative impact on the environment.

DIN EN 13432

DIN EN 13432 stands for «industrial compostability» and means that a material degrades to water, carbon dioxide and biomass in industrial composting operations under defined conditions (time, temperature, oxygen, humidity) and in the presence of microorganisms or fungi.

DIN EN 12875

The standardised symbol for both the DIN EN 12875 and DIN EN 12875-2 standards indicates that household goods are dishwasher-safe in the broadest sense.

SA 8000

SA 8000 is an international standard that seeks to improving working conditions, and serves as a minimum requirement for social and labour standards. SA 8000 is based on conventions of the International Labour Organization (ILO) and the United Nations (UN).

SEDEX AND SMETA

Supplier Ethical Data Exchange is a membership organisation for companies that have committed themselves to continuously improving ethical standards in their supply chain. The audit covers areas such as working conditions, occupational health and safety, environmental management and hygiene.

ISO 14001

The international environmental management standard ISO 14001 sets out internationally agreed requirements for an environmental management system, and is part of a family of standards. This includes numerous other standards in various areas of environmental management, such as life cycle assessments, environmental indicators and environmental performance evaluation.

FSC®

FSC® stands for «Forest Stewardship FSC®», an international certification system for more sustainable forestry. FSC®-certified forests and plantations, which among other things are subject to strict ecological and social principles are managed in order to protect conservation.

FOOD SAFETY

Food safety includes the aspect of hygiene. It stands for all measures and concepts that are intended to ensure that food is suitable for consumption by the end consumer without any adverse effects or damage to health.

DISTRIBUTION PARTNERS – NATURALNESS TRANSCENDS BORDERS

Advice and product availability in 15 countries.

Sustainability is very much in demand. Thus it is that we are delighted to offer you our natural products of the naturese brand in nearly every European country. Regional distribution partners are always ready to help you with expert advice, and can supply you directly from the local ware-

houses. That way you benefit from short delivery times and competent regional support. The distribution network is organised from the headquarters in Switzerland and the two subsidiaries in Germany and Austria. In addition, we have established exclusive partnerships for you in some countries in order to offer you expert local support.

Happy to Serve.

A PROMISE THAT MAKES EVERYONE HAPPY

«Happy to serve» is the core of all we do, a credo we have always lived by since our founding in 1935 and are now communicating to you conceptually and visually through our entire presentation: we search out the best solutions for you, look ahead conscientiously on your behalf and make every effort until you are completely thrilled. **And that's a promise!**

Serving is part of your job. And ours too. **Making the guest happy** is the top priority. This has been our guiding principle for almost 90 years, and everything else flows out of that. We are a traditional Swiss company with 500 or so staff and the very special passion to serve up the very best for you, always with a smile.

Our group of companies has grown many times over since its founding – and now has branches in Switzerland, Germany, Austria, Russia, Romania and Turkey as well as sales partners throughout Europe. Today our business model stands on three strong pillars: in the **food** sector, we specialise in seasonings and enhancements, which we develop for you with

great sensitivity. Our **non-food** business revolves around functional packaging, which we always have ready on hand for you. And thanks to our focus on **safety**, you know your food is always safe in our hands.

Our success over the past decades is based on a clear recipe: it takes an alert mind. Because it's only by listening attentively that we can present the right solutions – on a silver platter, as it were. You could say our **exceptional customer proximity** is our open secret for every perfect idea. But it also requires persistence and consistency. Because the best answer to your needs has to be well-researched and optimally developed. In combination with an unprecedented commitment, this results in complete satisfaction. Your satisfaction. And ours too.
